

# DSEWebNet®

Industry-Leading Remote  
Control & Monitoring Software

SUPPORTS COMMUNICATION ACROSS MULTIPLE DEVICES

# ADVANCED REMOTE MONITORING OF GENSETS, PUMPS & COMPRESSORS.

Welcome to DSEWebNet® - the industry-leading online management tool for remote control and monitoring of generators, pumps and compressors.

Allows 24/7 access to multiple applications from anywhere in the world, and offers a range of outstanding features suitable for multiple applications. Available in desktop and mobile versions, DSEWebNet® is both powerful and versatile.

*"Our maintenance engineers were regularly required to go to site to fix issues with our generator fleet. Very often they arrived to find that the E Stop had been pressed or they did not have the right part to fix the problem. Now, with DSEWebNet® in place, we can see the live system status allowing us to diagnose problems in advance, saving us a considerable amount of time and money".*

*"Many of our generators are in unsupervised sites and were continually running out of fuel. Since we installed DSEWebNet® we automatically receive emails when the fuel level is low, so timely refuelling can be arranged".*

*"As a rental company one of the key benefits of DSEWebNet® to us is the remote engine reporting. This allows us to effectively manage the contracted running hours of our entire rental fleet".*

### User Configurable Access

Allocate different user privileges, giving admin users the ability to provide full control or read only access, to prevent accidental system changes.

### App for Mobile & Tablet

Available for iOS and Android devices. The App can be linked to sites pre-configured using a desktop connection.

### Single User or Organisational Accounts

Operate as a single user with full control or create an organisational account allowing access to multiple users with flexible permissions.

### Geo-Fencing & Asset Tracking

Protect against theft or movement by creating a virtual geographic boundary around your equipment using GPS.

### Configurable Reporting

Choose the reports you want to see and send automatically by email or SMS to a maximum of 25 users.

### Maintenance Scheduling & Logging

Plan and customise essential maintenance schedules and keep logs of previous maintenance work for all users to view.

### Configurable User Interfaces

Create bespoke user interfaces using configurable widgets and templates to allow quick and easy access to key equipment and site data.

### Event Triggers

Set up event triggers to email or message users when specific conditions occur, including active alarms, low fuel levels and genset status.

### Customisable Branding

Organisational accounts allow custom branded backgrounds and logos to be used, producing screens with a bespoke corporate identity.

### Works across any phone network

Compatible with SIM cards from any network provider, allowing our DSE890 and DSE891 to be used globally.

## KEY INDUSTRIES

## WORKS ACROSS MULTIPLE PLATFORMS

# Wherever you are, wherever your application, DSEWebNet® keeps you in control.

A gateway device is required to use DSEWebNet®.  
There are two different variants available.

**DSE890**  
DSEWebNet® Gateway  
3G (GSM)/Ethernet

**DSE891**  
DSEWebNet® Gateway  
Ethernet Only

## Efficient Fleet Management.
